## **SECTION 2. BACKGROUND**

The Silver Spring Lake Dam is located in North Kingstown (Washington County) on a parcel of land designated for open space and situated between Silver Spring Road and Tower Hill Road (Rt-1). The dam impounds the Mattatuxet River to create Silver Spring Lake. It is owned by the State of Rhode Island and is operated/maintained by RI DEM Division of Fish and Wildlife.

The Silver Spring Lake Dam is an earth embankment dam, approximately 140 feet in length with a structural height of approximately 12 feet (hydraulic height of 10 feet).

The embankment is divided into two sections: with the left embankment extending approximately 40-feet from the left abutment to the primary spillway and the right embankment extending approximately 70- feet from the primary spillway to the right abutment. The upstream side of the left embankment is supported by a vegetated earthen slope that is lined with boulders at the waterline. The upstream side of the right embankment is supported by a concrete wall between the primary spillway and the right abutment, which is located at the end of the right training wall of the gated outlet structure. The crests of both the left and right embankment are vegetated and about 20 and 15 feet wide, respectively. Both embankments are supported on the downstream side by dry laid stone walls. Appurtenant structures include a primary spillway and an outlet structure.

The primary spillway, located centrally within the dam, is an overflow structure constructed of stone masonry with a concrete cap, concrete approach slab, and is flanked by concrete training walls. The spillway is about 40.5 feet long and is divided into 5 evenly spaced bays by 4 pairs of concrete piers. The piers are offset by about 4 feet, oriented in the upstream-downstream direction, and consist of reinforced square concrete columns, which also function as supports for a timber footbridge

The Silver Spring Lake Dam is a high hazard dam currently listed as “Unsafe” due to vegetation overgrowth and components that no longer function as originally intended. Below is a summary of key findings reported during the dam’s last inspection (2013):

1. Vegetation overgrowth along the left embankment, within the joints of the downstream wall, and throughout the downstream toe
2. Cracked, spalled, and soured concrete throughout the concrete structures, especially at the waterline
3. Depression within the crest of the right embankment
4. Bulging sections of the downstream masonry wall
5. Spillway approach and discharge channels overgrown with vegetation
6. An inoperable outlet with a filled-in approach

It is DEM's intent to repair the Silver Spring Lake Dam in accordance with the Bid Documents to return the dam to a "Not Unsafe" status.

## SECTION 3: SCOPE OF WORK AND REQUIREMENTS

## SECTION 5: EVALUATION AND SELECTION

Proposals shall be reviewed by a technical evaluation committee (“TEC”) comprised of staff from State agencies. The TEC first shall consider technical proposals.

Technical proposals must receive a minimum of 60 (85.7%) out of a maximum of 70 points to advance to the cost evaluation phase. Any technical proposals scoring less than 60 points shall not have the accompanying cost or ISBE participation proposals opened and evaluated. The proposal will be dropped from further consideration.

Technical proposals scoring 60 points or higher will have the cost proposals evaluated and assigned up to a maximum of 30 points in cost category bringing the total potential evaluation score to 100 points. After total possible evaluation points are determined ISBE proposals shall be evaluated and assigned up to 6 bonus points for ISBE participation.

The Division of Purchases reserves the right to select the vendor(s) or firm(s) (“vendor”) that it deems to be most qualified to provide the goods and/or services as specified herein; and, conversely, reserves the right to cancel the solicitation in its entirety in its sole discretion.

Proposals shall be reviewed and scored based upon the following criteria:

<b>Criteria</b>	<b>Possible Points</b>
Staff Qualifications	10 Points
Capability and Qualifications of the Vendor	30 Points
Approach/Work Plan	30 Points
<b>Total Possible Technical Points</b>	<b>70 Points</b>
Cost proposal*	30 Points
<b>Total Possible Evaluation Points</b>	<b>100 Points</b>
ISBE Participation**	6 Bonus Points

**\*Cost Proposal Evaluation:**

The vendor with the lowest cost proposal shall receive one hundred percent (100%) of the available points for cost. All other vendors shall be awarded cost points based upon the following formula:

$$(\text{lowest cost proposal} / \text{vendor's cost proposal}) \times \text{available points}$$

For example: If the vendor with the lowest cost proposal (Vendor A) bids \$65,000 and Vendor B bids \$100,000 for monthly costs and service fees and the total points available are thirty (30), Vendor B's cost points are calculated as follows:

$$\$65,000 / \$100,000 \times 30 = 19.5$$

**\*\*ISBE Participation Evaluation:**

a. Calculation of ISBE Participation Rate

1. ISBE Participation Rate for Non-ISBE Vendors. The ISBE participation rate for non-ISBE vendors shall be expressed as a percentage and shall be calculated by dividing the amount of non-ISBE vendor's total contract price that will be subcontracted to ISBEs by the non-ISBE vendor's total contract price. For example if the non-ISBE's total contract price is \$100,000.00 and it subcontracts a total of \$12,000.00 to ISBEs, the non-ISBE's ISBE participation rate would be 12%.
2. ISBE Participation Rate for ISBE Vendors. The ISBE participation rate for ISBE vendors shall be expressed as a percentage and shall be calculated by dividing the amount of the ISBE vendor's total contract price that will be subcontracted to ISBEs and the amount that will be self-performed by the ISBE vendor by the ISBE vendor's total contract price. For example if the ISBE vendor's total contract price is \$100,000.00 and it subcontracts a total of \$12,000.00 to ISBEs and will perform a total of \$8,000.00 of the work itself, the ISBE vendor's ISBE participation rate would be 20%.

b. Points for ISBE Participation Rate:

The vendor with the highest ISBE participation rate shall receive the maximum ISBE participation points. All other vendors shall receive ISBE participation points by applying the following formula:

$$(\text{Vendor's ISBE participation rate} \div \text{Highest ISBE participation rate}) \\ \times \text{Maximum ISBE participation points}$$

For example, assuming the weight given by the RFP to ISBE participation is 6 points, if Vendor A has the highest ISBE participation rate at 20% and Vendor B's ISBE participation rate is 12%, Vendor A will receive the maximum 6 points and Vendor B will receive  $(12\% \div 20\%) \times 6$  which equals 3.6 points.

**General Evaluation:**

Points shall be assigned based on the vendor's clear demonstration of the ability to provide the requested goods and/or services. Vendors may be required to submit additional written information or be asked to make an oral presentation before the TEC to clarify statements made in the proposal.
