Utility Relocation Notes for MassDOT Contractor
 Unless otherwise noted by Contract, the MassDOT Contractor is to provide the District Construction Office with 7 Calendar Days advance notification in order to validate the current progress and provide the required 30 Days advance notice-to-proceed for the first Utility - and each subsequent Utility. These advance notifications are to be identified in the Contractor's Schedules (Pre-Con preparation, Baseline, Subnets, and Updated/Monthly Schedules) as specified in Subsection 8.02 (for DBB Contracts) and/or Section 9 (of DBB Contracts). Note: The durations included below do not include these lead-times. See Additional Important Basis notes for Contractor - on last PUC Form page.

Additional notes:

Suggested Sequence of Relocation (Based on Consultant proposed construction staging)
 The sequence as detailed on the following pages is based on the consultants proposed staging plan. This information was compiled through meetings that included all of the utilities listed below along with the designer and the Towns of Marion and Wareham. The information provided is the best available information prior to project advertisement.

RESPONSIBLE PARTY	DESCRIPTION - Utility Relocation Phases, Tasks and Activities	Estimated Duration (Work Days) by Utilities (Lead time not included)	Concurrent / Exclusive Utility Work				Access Restraint & Limitations of Operations Notes	
			Exclusive Utility on site	Concurrent Utilities	Contractor Off-Site	Contractor Concurrent	Potential Access Restraint (Yes/No)	Reason/Note (optional)
Task 7	<p>Comcast</p> <p>Comcast - Pull New Fiber optic Line into permanent pathway across bridge.</p> <p>Comcast - Set up Splice locations on either side of Work Zone.</p> <p>Comcast - Night Cutover to Permanent path.</p> <p>Comcast - Wreckout Original Fiber line.</p> <p>Comcast - Secure new Plant and Splice enclosures.</p> <p>Sub-Total 14</p>	5						
Task 8	<p>Verizon</p> <p>Verizon - CWI to review conduit placed by MassDOT.</p> <p>Verizon - Line to Rod and Rope new Conduit.</p> <p>Verizon - Line to Place new Fiber Cable.</p> <p>Verizon - Splice to splice new cable and trim out old</p> <p>Verizon - Remove old Plant.</p> <p>Verizon - Remove old poles and guying.</p> <p>Sub-Total 106</p>	25						
Task 9	<p>Eversource Electric</p> <p>Eversource-Electric - Removal of poles.</p> <p>>Contractor to notify Utilities 30 days prior to starting work.</p> <p>>Contractor to coordinate proposed gas main relocation with proposed drainage, guardrail, bridge approach, and electric duct bank.</p> <p>Sub-Total 2</p>	2						
C	<p>UTILITY OPERATIONS - Underground</p> <p>National Grid Gas - Excavate & Shore, Trench and install approx 275 FT of 4-inch 60 PSIG Plastic Gas Main, Main Connections/ Tie-ins, Stop/Tap/Purge/Cut/Cap, Backfill.</p> <p>Sub-Total 15</p>	15						
Task 10	<p>Sub-Total 15</p>	15						
	<p>IMPORTANT BASIS NOTES - FOR CONTRACTOR</p> <p>1 Unless otherwise specified in the MassDOT Construction Contract, or unless specifically noted within this PUC Form, these durations (herein) are based upon the Contractor providing <i>unimpeded access</i> to the Utility company to perform Utility relocations (see Note 5 - Access).</p> <p>2 "Concurrent Utilities" operations noted herein, are to signify those Utility Company operations that can be worked concurrently (e.g. Utility A and Utility B work on-site together) - MassDOT and the Contractor are to prepare NTPs to Utilities accordingly.</p> <p>3 "Potential Access Restraints" noted within this PUC Form are for planning purposes. See MassDOT Contract for Contractual Access Restraints (refer to Subsections 8.02, 8.03, and/or 8.06 for Design Bid Build Contracts and Volume II Section 9 for Design Build Contracts).</p> <p>4 Utility non-work periods - For planning purposes, the durations above contain some non work days (contingency) for New England conditions (precipitation, high temperatures, low temperatures, snow, ice). Gas line work however, typically has a seasonal restriction and can NOT be installed from 15-November to 15-March. Municipally Owned Electric and Gas Utilities are also restricted from proceeding from 15-November to 15-March. The Contractor shall (and the CTD plan) reflect this calendar restriction within the schedule (unless otherwise note).</p> <p>5 Access - Unless otherwise noted in the Contract, and in addition to the 'enabling' notes above, the Contractor must provide safe and unimpeded access (for trucks, lifts, cranes, etc.) to the Utilities, to allow for the proposed relocation(s) - including but not limited to snow removal, clearing and grubbing, guard rail removal, barrier removal, tree removal, and grading.</p> <p>6 For all MassDOT construction contracts issued after January 2014, the new Utility Coordination/documentation specification is required. This is Section 8.14 in Design-Bid-Build Contracts (see Design-Build Index reference for applicable section #).</p> <p>7 Prior to starting any and all enabling work for Utilities, the Contractor is to plan in advance with submittals and approved durations.</p> <p>8 * Potential District Initiated Early Utility Relocation - if noted herein, the District reserves the right to initiate early utility relocation in advance of the Contract NTP. In submitting a bid price and in the development/basis of the Baseline Schedule, the Contractor shall not plan the Work with the potential benefit of any form of 'early utility relocation.' As a requirement of the Baseline submission, unless otherwise noted in this Specification, the earliest that the first Utility company is to receive the 30 days advance notification to mobilize to the site, will be 7 calendar days after the pre-construction meeting and never sooner than 7 days after the Contract NTP.</p> <p>9 ** Assumed Duration, Not Provided By Utility Company.</p>
