Question:

Do the culvert sections have to be precast as 4-sided? Or will 3-sided "U" sections and separate top slabs be acceptable?

Response: (Prime Designer)

The precast concrete culvert sections are allowed to be formed separate from the top slab as long as the constructed culvert includes appropriate shear keys and bolted connections to meet the requirements of the contract documents and safely support the traffic loading and soil loading.

All other of the portions of the Contract Documents remain **unchanged**. Please be reminded to acknowledge this Addendum on the bid forms.
